

Problem: Smart Bank Account Management System

Problem Statement

A bank wants to develop a system to manage customer accounts. For each customer, the following information needs to be maintained:

- Account Number
- Account Holder Name
- Current Balance

The bank should provide the following facilities:

1. Create a new bank account.
2. Deposit money into the account.
3. Withdraw money from the account.
4. Display the account details.
5. Prevent withdrawal if the balance is insufficient.
6. Display a success message whenever a transaction is completed.

Sample Interaction

Enter Account Number: 1001

Enter Account Holder Name: Anuj Kumar

Enter Initial Balance: 5000

----- MENU -----
